2 . Reason for the dividend amount

In determining dividends from surplus, the Company’s basic policy is to appropriately returning profits while securing funds for capital investment, an indispensable driver of greater earnings, and to strengthen its financial position. These actions are founded in its business plans over the medium to long term and take into consideration trends in business performance.

In addition, although we set a target dividend payout ratio of 20% in our medium-term management plan, “Dominate 1000,” introduced in April 2022, we have increased this to 30% following a review of the plan in November 2023.

For the fiscal year ended March 31, 2025, the Company decided to pay a year-end dividend of ¥9 per share, based on comprehensive consideration of performance for the year and the business environment, among other factors. This makes the annual dividend per share ¥17, including the interim dividend already paid.
